= Voice of Hope Production  
 = Independent Production

**NOTE:** Transmissions are subject to availability of electricity from the power grid. 'Load Shedding' has been implemented in Zambia, which results in rotating power outages for 8 hours per day.

In weeks when those outages occur at our transmitter site during local evenings, we may instead transmit during local mornings from 06-11 hours (0400-0900 UTC) on 9680 kHz.

Morning transmissions will contain the same programme content as would normally be transmitted during local evenings from 18-23 hours (1600-2100 UTC) on 4965 kHz.

This will vary week by week.
